

The affordable professional option

• Effective • Clinically proven • Non-invasive

NOVA *Shape*

Advanced Body Contouring & Fat Reduction option

Unique ultrasound technology

Dynamic Resonant Low Frequency Cavitation
Non-focus, no superstructure
Mechanical Cavitation, non-thermal

Selective fat cell lysis - Reduces fat deposits

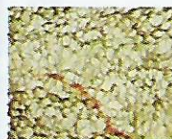

No damage to nerves, blood vessels.
No effect on hepatic system

Variable low frequency

Unlike focused fixed frequency
Sweeps specific frequency to locate fat tissue

Scientifically proven

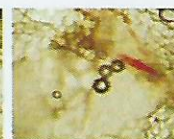

Scientific papers confirm superiority
Superior results compared to similar systems
After 3-5 treatments up to 4cm reduction on
thighs and waist

Adipose and Vascular tissue
before treatment

Adipose and Vascular tissue
during treatment

Adipose and Vascular tissue
after treatment

Fully Portable
